

Investigate subtraction

Use the shape below to make up your own subtraction sums by linking numbers. You can go from any number to any other number, passing through the subtraction sign each time.

Eg $100 - 20 = 80$

Write the sums down and the answers without showing any working out.

If you are really feeling on good form you may like to time yourself to see how many you can do in 5 minutes.

Look for systematic list of sums e.g. all subtractions from 130 completed.

Look out for incorrectly set out sums giving negative answers e.g. $80 - 130$
