

If you know one multiplication fact you can quickly work out two division facts!

If you know that  $5 \times 2 = 10$  then you can work out that:

$$10 \div 2 = 5 \quad \text{and} \quad 10 \div 5 = 2$$

Make two division sentences from these multiplication facts:

1.  $7 \times 2 = 14$       $\div$   =     and      $\div$   =

2.  $10 \times 5 = 50$       $\div$   =     and      $\div$   =

3.  $7 \times 5 = 35$       $\div$   =     and      $\div$   =

4.  $4 \times 3 = 12$       $\div$   =     and      $\div$   =

5.  $6 \times 3 = 18$       $\div$   =     and      $\div$   =

6.  $2 \times 9 = 18$       $\div$   =     and      $\div$   =

## Answers

Page 1

1.  $14 \div 2 = 7$     and     $14 \div 7 = 2$

2.  $50 \div 5 = 10$     and     $50 \div 10 = 5$

3.  $35 \div 5 = 7$     and     $35 \div 7 = 5$

4.  $12 \div 3 = 4$     and     $12 \div 4 = 3$

5.  $18 \div 3 = 6$     and     $18 \div 6 = 3$

6.  $18 \div 9 = 2$     and     $14 \div 2 = 7$
