

Subtracting from thousands

Without doing any working out on paper, write the answers to these sums:

1. $3\ 000 - 2 =$

2. $4\ 000 - 4 =$

3. $6\ 000 - 6 =$

4. $7\ 000 - 8 =$

5. $- 3 = 2\ 998$

6. $- 5 = 1\ 997$

7. $- 7 = 1\ 995$

8. $- 9 = 5\ 993$

9. $6\ 000 -$ $= 5\ 991$

10. $4\ 000 -$ $= 3\ 993$

11. $1\ 000 -$ $= 997$

12. $2\ 000 -$ $= 1\ 994$

Now try these. Not too tricky, I hope.

13. $4\ 003 - 6 =$

14. $1\ 006 - 7 =$

15. $5\ 004 - 8 =$

16. $6\ 007 - 9 =$

Subtracting one digit from thousands
