

Addition

Add these and put the answers inside the shape.

1. $15 + 5 =$  2. $14 + 4 =$ 

3. $30 + 8 =$  4. $18 + 2 =$ 

5. $12 + 7 =$  6. $20 + 8 =$ 

7. $14 + 5 =$  8. $6 + 30 =$ 

9. $22 + 7 =$  10. $32 + 6 =$ 

I hope you got on OK with these!

2401-01 Addition: 2-digits and 1-digit (pg 1) Answers

Concepts

In year 2 children will continue to develop their understanding of addition, beginning to work with larger numbers, up to 100.

Addition should be thought of as the combination of two sets to make a total set. For this to be understood a number of words also need to be used and understood, re-inforcing the work done in year 1:

more add sum total altogether equals sign

Especially important is that the child can read and write the plus (+) sign and the equals (=) sign.

Equals can be explained as meaning 'is the same as'.

The idea of adding zero to a number leaves it the same can be a difficult concept to understand and zero should be included in any questions involving simple addition.
