Tables grids

On the next page is a tables grid for the 6x, 7x, 8x, 9x and 10x table.
The grid is filled in by taking the numbers across the top with the
numbers down the side as shown below.

x	6	7
2	12	14
6	36	42

These are mostly the harder tables to learn, apart from the tens. The
nines also have a neat pattern to them; of course remembering that the
digits always add up to 9 helps with this table.

There are many different approaches to this type of problem. Some
children fill in the answers in strict order, others go through and
complete the ones they know off by heart, and then try to work the rest
out.
It is a good idea to set a time limit to these to encourage learning them
off by heart.

Lots more on tables on the 'It's All Figured Out!' CD from mathsphere.co.uk
