

Calculator Game: 4 times table  
Maths worksheets from mathsblog.co.uk

Equipment:

Multiples of 4 grid. Calculator. Counters (2 colours) or pen.

How to Play:

Set the calculator to make it a 'multiply by 4' machine. You can do this on most calculators by pressing:

The display will show 0. All you need to do is press a number and press = and the display will show the answer to the number multiplied by 4.

Take turns to choose a number in a square. Enter a number on the calculator that you think will produce the number in the square when multiplied by 4. Press = to see if you are correct.

If the answer is the number on the grid then cover it with your coloured counter (or cross out with a coloured pen.)

The winner is the first player to put 4 counters in a row, across, down or diagonally.

20	32	12	40	0	36
8	36	28	16	40	24
24	16	36	20	32	8
4	28	0	12	4	24
16	40	32	8	36	20
32	0	4	28	12	40
