

Calculator Game: Multiples of 10

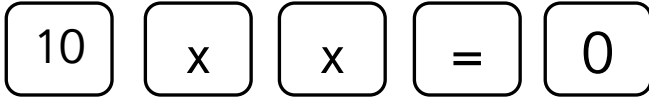

Maths worksheets from mathsblog

Equipment:

Multiples of 10 grid. Calculator. Counters (2 colours) or pen.

How to Play:

Set the calculator to make it a 'multiply by 10' machine. You can do this on most calculators by pressing:

The display will show 0. All you need to do is press a number and press = and the display will show the answer to the number multiplied by 10. You don't need to press the x button.

Take turns to choose a number in a square. Enter a number on the calculator that you think will produce the number in the square when multiplied by 10. Press = to see if you are correct.

If the answer is the number on the grid then cover it with your coloured counter (or cross out with a coloured pen.)

The winner is the first player to put 4 counters in a row, across, down or diagonally.

40	110	0	160	210	280
310	270	60	290	90	340
100	350	220	30	180	120
260	20	320	130	240	70
330	140	300	10	50	190
170	80	250	200	150	230
