

Calculator Game: Multiples of 5

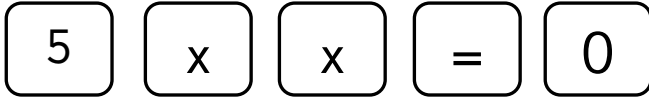

Maths worksheets from mathsblog

Equipment:

Multiples of 5 grid. Calculator. Counters (2 colours) or pen.

How to Play:

Set the calculator to make it a 'multiply by 5' machine. You can do this on most calculators by pressing:

The display will show 0. All you need to do is press a number and press = and the display will show the answer to the number multiplied by 5. You don't need to press the x button.

Take turns to choose a number in a square. Enter a number on the calculator that you think will produce the number in the square when multiplied by 5. Press = to see if you are correct.

If the answer is the number on the grid then cover it with your coloured counter (or cross out with a coloured pen.)

The winner is the first player to put 4 counters in a row, across, down or diagonally.

70	125	45	15	170	200
10	190	75	100	35	175
150	65	130	85	5	20
40	140	180	60	105	115
220	30	90	160	0	80
95	110	55	25	230	120
