

Calculator Game: 6 times table
Maths worksheets from mathsblog.co.uk

Equipment:

Multiples of 6 grid. Calculator. Counters (2 colours) or pen.

How to Play:

Set the calculator to make it a 'multiply by 6' machine. You can do this on most calculators by pressing:

The display will show 0. All you need to do is press a number and press = and the display will show the answer to the number multiplied by 6.

Take turns to choose a number in a square. Enter a number on the calculator that you think will produce the number in the square when multiplied by 6. Press = to see if you are correct.

If the answer is the number on the grid then cover it with your coloured counter (or cross out with a coloured pen.)

The winner is the first player to put 4 counters in a row, across, down or diagonally.

12	60	18	54	30	24
6	24	48	36	0	18
42	6	30	24	48	12
36	0	60	12	42	54
48	18	54	6	24	36
60	30	42	18	54	0
