

Calculator Game: 7 times table
Maths worksheets from mathsblog.co.uk

Equipment:

Multiples of 7 grid. Calculator. Counters (2 colours) or pen.

How to Play:

Set the calculator to make it a 'multiply by 7' machine. You can do this on most calculators by pressing:

The display will show 0. All you need to do is press a number and press = and the display will show the answer to the number multiplied by 7.

Take turns to choose a number in a square. Enter a number on the calculator that you think will produce the number in the square when multiplied by 7. Press = to see if you are correct.

If the answer is the number on the grid then cover it with your coloured counter (or cross out with a coloured pen.)

The winner is the first player to put 4 counters in a row, across, down or diagonally.

7	14	70	35	77	49
63	56	42	0	21	7
42	49	28	70	56	14
0	21	63	42	28	77
70	35	14	77	0	56
28	7	49	21	35	63
