

Calculator Game: 9 times table
Maths worksheets from mathsblog.co.uk

Equipment:

Multiples of 9 grid. Calculator. Counters (2 colours) or pen.

How to Play:

Set the calculator to make it a 'multiply by 9' machine. You can do this on most calculators by pressing:

The display will show 0. All you need to do is press a number and press = and the display will show the answer to the number multiplied by 9.

Take turns to choose a number in a square. Enter a number on the calculator that you think will produce the number in the square when multiplied by 9. Press = to see if you are correct.

If the answer is the number on the grid then cover it with your coloured counter (or cross out with a coloured pen.)

The winner is the first player to put 4 counters in a row, across, down or diagonally.

72	18	90	45	9	27
63	9	36	18	72	0
45	54	81	27	63	90
27	90	9	45	0	54
81	63	18	72	36	45
0	36	27	54	81	18
