

Dividing by 1

Maths worksheets from mathsblog.co.uk

I'm puzzled! What happens to a number of sweets if I divide them by 1?

That's easy! If I have 6 sweets to divide into one pile that means all 6 sweets are in the pile. (All for me!)

6 divided by 1 is 6.

When you divide a whole number by one, the answer is the whole number.

Have a go at these questions:

1. $7 \div 1 = \square$

2. $10 \div 1 = \square$

3. $4 \div 1 = \square$

4. $5 \div \square = 5$

5. $9 \div \square = 9$

6. $6 \div \square = 6$

7. $\square \div 1 = 8$

8. $\square \div 1 = 2$

9. $\square \div 1 = 10$

10. $15 \div 1 = \square$

11. $1 \div \square = 1$

12. $\square \div 1 = 20$

Answers
