

If you know that $6 \times 2 = 12$ then you can work out that:

$$12 \div 2 = 6 \text{ and } 12 \div 6 = 2$$

Make two division sentences from these multiplication facts:

1. $2 \times 8 = 16$ $\square \div \square = \square$ and $\square \div \square = \square$

2. $7 \times 10 = 70$ $\square \div \square = \square$ and $\square \div \square = \square$

3. $4 \times 8 = 32$ $\square \div \square = \square$ and $\square \div \square = \square$

4. $3 \times 5 = 15$ $\square \div \square = \square$ and $\square \div \square = \square$

5. $6 \times 4 = 24$ $\square \div \square = \square$ and $\square \div \square = \square$

6. $3 \times 9 = 27$ $\square \div \square = \square$ and $\square \div \square = \square$
