

Using standard metric units (1)
Maths worksheets from mathsblog.co.uk

Try to learn the facts below. They are all metric measurements of length, weight or capacity.

1 kilometre equals 1 000 metres
1 metre equals 100 centimetres or 1 000 millimetres
1 centimetre equals 10 millimetres
1 kilogram equals 1 000 grams
1 litre equals 1 000 millilitres

Using the above information, answer these questions:

1. How many metres are there in 4 kilometres?
2. How many centimetres are there in 3 metres?
3. How many millimetres are there in 5 centimetres?
4. How many millimetres are there in 4 metres?
5. How many grams are there in 2 kilograms?
6. How many millilitres are there in 6 litres?
7. How many grams are there in 11 kilograms?
8. How many kilometres are 7 000 metres?
9. How many centimetres are 80 millimetres?
10. How many kilograms are 3 000 grams?
11. How many metres are 600 centimetres?
12. How many litres are 4 000 millilitres?
