

## Adding fractions with totals more than 1

Maths worksheets from [mathsblog.co.uk](http://mathsblog.co.uk)

Remember: to add decimals the denominators (bottom numbers) have to be the same. So:

1. Convert both fractions to the same denominator.

2. Then just add the numerators (top numbers).

### Example:

$$\text{eg } \frac{2}{3} + \frac{5}{9} = \frac{6}{9} + \frac{5}{9} = \frac{11}{9} = 1 \frac{2}{9}$$

1.  $\frac{8}{9} + \frac{1}{2} =$

2.  $\frac{6}{7} + \frac{1}{2} =$

3.  $\frac{3}{10} + \frac{3}{4} =$

4.  $\frac{8}{9} + \frac{5}{9} =$

5.  $\frac{7}{10} + \frac{2}{5} =$

6.  $\frac{2}{5} + \frac{9}{10} =$

7.  $\frac{2}{9} + \frac{4}{5} =$

8.  $\frac{7}{9} + \frac{6}{7} =$

### Answers

#### Page 1

1.  $1 \frac{7}{18}$

2.  $1 \frac{5}{14}$

3.  $1 \frac{1}{20}$

4.  $1 \frac{4}{9}$

5.  $1 \frac{1}{10}$

6.  $1 \frac{3}{10}$

7.  $1 \frac{1}{45}$

8.  $1 \frac{40}{63}$
