

How many different shapes can you make by joining four squares?

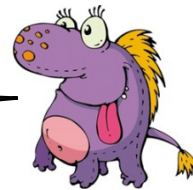

I have done one for you!

It has four edges.

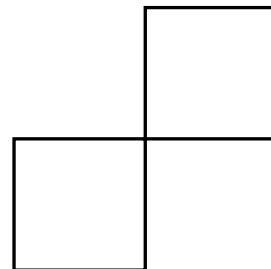

Square paper or 'dotty' paper is useful for this – not that I'm dotty!!

Be careful about what is meant by joining. Here are two examples:

Joined

Not joined

Shapes from 4 squares
Maths worksheets from mathsblog.co.uk

How many shapes can you make with 4 squares?
Draw each one and count the number of edges.

Number of edges
